FIG. 4

FIG. 5

FIG. 5 is a cross-sectional view of a lead-in bumper assembly for a loading dock. The assembly is mounted on a concrete base 14. A central bumper 26 is shown in cross-section, featuring a top surface 36 with a series of rectangular protrusions and a bottom surface 58. The bumper 26 is flanked by two side supports 22. The left side support 22 is connected to the base 14 by a vertical post 42. The right side support 22 is connected to the base 14 by a vertical post 40. A vertical dimension line 62 indicates the height of the side support 22. The top surface of the bumper 26 is covered with a material having a diagonal hatched pattern, while the side supports 22 have a cross-hatched pattern. The base 14 is shown with diagonal hatching.
